#### Product Description

Originally designed for the application of roofing felt, these nails are also widely used for built-up roofing, rigid foam insulation, attaching sidewall curtains in poultry buildings and for general packaging and crating. Many contractors prefer driving these sturdy all-steel nails over plastic cap nails. Large 15/16" domed caps are securely joined to sturdy ring shanks. Excellent holding power. Please note sizes available in STORMGUARD® (Double hot-dipped zinc-coated) for dependable corrosion resistance.
