

GYE14 Series Wall Mounted Bottle Filler With Angled Drinking Fountain

GYE14-R SHOWN

TECHNICAL ASSISTANCE TOLL FREE TELEPHONE NUMBER: 1.800.591.9360

Technical Assistance Fax: 1.626.855.4894

IMPORTANT: INSTALLATION AND SITE PREP FOR FREEZE RESISTANT OPTIONS "-FRA" WILL DIFFER FROM STANDARD! REFER TO DESIGNATED FREEZE RESISTANT INSTALLATION DETAILS PRIOR TO ROUGH-IN AND FIXTURE INSTALL FOR -FRA SERIES OPTIONS. FOR ADDITIONAL INFORMATION VISIT: www.MurdockMfg.com/Resources OR CONTACT YOUR LOCAL SALES REPRESENTATIVE.

NOTES TO INSTALLER:

- 1. Please leave this documentation with the owner of the fixture when finished.
- 2. Please read this entire booklet before beginning the installation.
- 3. Check your installation for compliance with plumbing, electrical and other applicable codes.

LIMITED WARRANTY - UNITED STATES & CANADA

Murdock warrants that its products are free from defects in material or workmanship under normal use and service for a period of one year from date of shipment from the factory. Murdocks's liability under this warranty shall be discharged solely by repair or replacement of defective material, provided Murdock is notified in writing within the time periods described above.

This warranty does not cover installation or labor charges and does not apply to materials, which have been damaged by other causes such as mishandling or improper care or abnormal use. The repair or replacement of the defective materials shall constitute the sole remedy of the Buyer and the sole remedy of Murdock under this warranty. Murdock shall not be liable under any circumstances for incidental, consequential or direct charges caused by defects in the materials, or any delay in the repair or replacement thereof. This warranty is in lieu of all other warranties expressed or implied. Product maintenance instructions are issued with each unit and disregard or non-compliance with these instructions will constitute an abnormal use condition and void the warranty. Stainless steel must be protected on jobsite during construction and must be properly maintained after the water has been introduced into the water cooler or drinking fountain, or Murdocks's limited warranty is void.

LIMITED EXPORT WARRANTY - One year on parts only.

Murdock™ assumes no responsibility for use of void or superseded data. © Copyright Murdock Mfg., City of Industry, CA Member of Morris Group International. Please visit www.murdockmfg.com for most current specifications.

GYE14 INSTALLATION INFORMATION

PRIOR TO INSTALLATION:

- 1. Read all installation instructions carefully, before proceeding.
- 2. Carefully remove fixture from packaging, preventing scratching or damage.
- 3. Units with -SO, -SOC option require six AA alkaline batteries (Not Provided).
- 4. Provide mounting surface, sufficient to support the fixture and loads on the fixture.
- 5. Provide rough-ins as shown on the roughing-in and dimensional drawing, including water supply and drain pipe.
- 6. Completely flush water supply lines of all foreign debris, before connecting to the fixture.

INSTALLATION: (see drainage & mounting roughing-in)

- 1. Create sufficient Blockout Area and mounting preparation according to Rough-In and Dimensional Drawing.
- Mount and secure Wall Mounting Plate to wall horizontally level as shown in Rough-In and Technical Dimensions.
 NOTE: Adjust height of bracket if fixture height required differs from dimensions shown.
 - <u>WARNING:</u> Wall Mounting Plate **MUST** be securely anchored to wall with fasteners sufficient to support a minimum pull-out rating of 1000lbs (454kg).
- 3. Remove Bottle Filler Bottom Access Panel and set aside in a safe place. Save the screws in a secure location for re-use in later stages of installation.
- 4. Prepare Fixture Assembly for mounting by ensuring all supply and waste connections are securely attached and ensuring that the 1/2"-13 x 2" Long Bolts (Provided) are loosely attached to the fixture.
- 5. Mount and secure Fixture Assembly to Wall Mounting Plate by making sure that all four 1/2"-13 x 2" Long Bolts (Provided) align and secure successfully.
- 6. Make up 3/8" OD Supply Connection to water supply, and 1-1/4" OD waste to P-Trap (by others). Attach Bottle Filler Bottom Access Panel using previously set-aside screws.

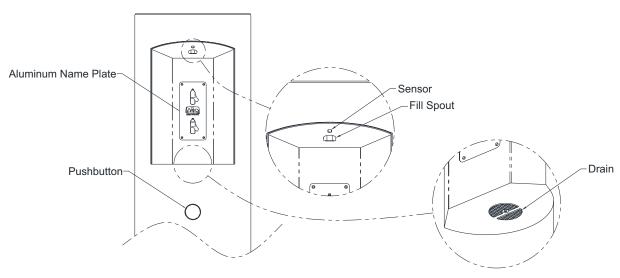

START UP:

Air within the bottle filler system or the structure supply piping will cause an irregular spout outlet stream until purged out by incoming water. Press and hold pushbutton until steady water stream is achieved.

OPERATION INSTRUCTIONS:

Hand operation: Hold container to be filled just below the filler tube in the center of the unit, then depress pushbutton. When the container is almost filled, release the pushbutton. Refer to Flow Adjustment detail on Parts Drawing if needed.

Sensor Operation: Hold container to be filled just below the sensor in the center of the filler spout and then move the container upward and water flow will start automatically. When the container is almost filled, lower the container below the sensor until the water stops flowing. (See label on the bottle filler)

GYE14 FIXTURE MOUNTING AND ANCHORING

Make up Mounting Rough-In and Blockout Area into sufficient wall backing.

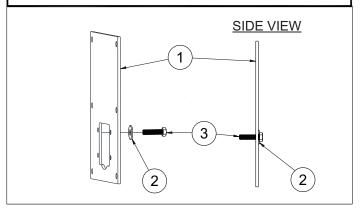

IMPORTANT: Industry standard wall backing for wall hung fixtures is required. Installer provided wall anchors and wall anchoring hardware must be appropriate for wall construction and have a minimum pull-out rating of 1000lbs (454kg).

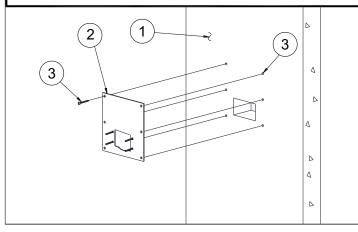

- Finished Wall
- Finished Floor
- Wall Anchors (Not Provided)

- Mounting Plate
- 2 1/2" Flat Washer
- 1/2"-13 x 2" Long Bolts (Provided)

Install 1/2"-13 x 2" Long Bolts (Provided) into the Mounting Plate from rear.

Secure Wall Mounting Plate to the Finished Wall using Installer Provided Hardware.

NOTE: It is recommended to level and plumb Wall Mounting Plate prior to mounting Fixture Assembly.

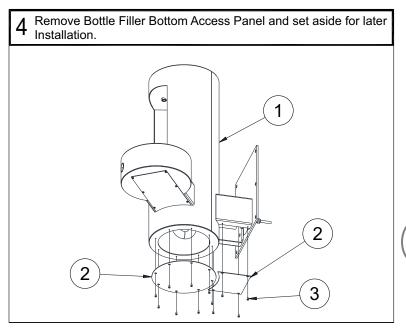

- Finished Wall
- Mounting Plate
- Installer Provided Wall Fasteners/Anchors

- 4 1-1/4" OD Waste Outlet with Optional P-Trap (Provided)

PUSH-IN FITTING INSTALLATION

NOTE: FITTINGS AND TUBE SHOULD BE KEPT CLEAN, BAGGED AND UNDAMAGED PRIOR TO INSTALLATION.

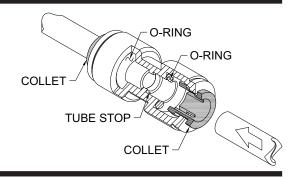

TO CUT TUBE:

Cut to fit length of 1/4" PE tubing and remove any burrs or sharp edges. Ensure that the outside diameter is free from score marks. Tube ends should be square.

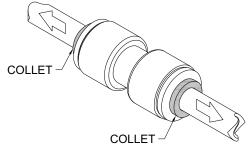

INSERTING THE TUBE:

 Firmly and fully insert the tubing end into the push-in fitting up to the tube stop located approximately ½" deep.

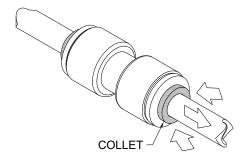

Pull on the fitted tubing to ensure it is secure. Tube should not come free from the fitting. Water test the connection assembly prior to leaving the site to ensure there are no leaks.

DISCONNECTING THE TUBE:

To disconnect the tube from the fitting ensure that the water line is depressurized. Push collet square towards the push-in fitting body and hold. While holding the collet in, pull on the PE tubing to remove from the push-in fitting.

MURDOCK MFG. • 15125 Proctor Avenue • City of Industry, CA 91746 USA Phone 800-453-7465 or 626-333-2543 • Fax 626-855-4860 • www.murdockmfg.com

GYE14 TROUBLESHOOTING AND MAINTENANCE

TROUBLESHOOTING:.

1. RESTRICTED OR NO WATER FLOW:

- a. Ensure Water Supply service stop valve is fully open.
- b. Verify minimum 20 psig supply line flow pressure.
- c. Check for twist or kinks in spout tubing.
- d. Check the water inlet "Y" strainer. Sediment from the main supply can get trapped in the screen along with installation materials such as pipe dope and flux. The screen should be cleaned and checked on a regular basis and replace if needed.
- e. Flow control in solenoid valve outlet elbow clogged remove & clean.

SENSOR TROUBLESHOOTING:

1. IF LIGHT WITHIN SENSOR DOES NOT FLASH ONCE WHEN USER IS WITHIN RANGE:

- a. Verify 9VDC output of battery pack.
- b. Replace defective batteries.
- c. Sensor in "Security Mode" after 30 seconds of constant detection. Remove source of detection and wait 30 second before checking.
- d. Sensor is picking up a highly reflective surface. Eliminate cause of reflection and wait 30 seconds before checking.

2. IF LIGHT WITHIN SENSOR LENS FLASHES ONCE WHEN THE USER IS WITHIN RANGE:

- a. Repair bad connection from sensor to solenoid.
- b. There is debris or scale in the solenoid assembly. Remove solenoid, pull out plunger and spring. Clean with scale remover solution.
- c. There is debris or scale in center or two holes in convolution of the water diaphragm. Remove and clean.

CLEANING & MAINTENANCE GUIDE:

For Powder coated units: Units should be cleaned using a mild soap solution with a sponge or cotton cloth. Wipe down surfaces then rinse with clean water.

For Stainless steel units:

- 1. To remove water spots or rust spots, stainless steel cleaner/polish on a cloth is recommended.
- 2. If there are stubborn spots or if you wish to treat a scratch, synthetic abrasive general purpose pads such as scotch brite are recommended.
- 3. Apply stainless steel cleaner/polish to the synthetic abrasive pads and carefully rub the panel with the grain.
- 4. <u>DO NOT</u> use harsh chemicals, abrasive or petroleum based cleaners. Use of these will void the Murdock warranty. DO NOT use abrasives on powder coated units.
- 5. Stainless steel should be kept clean at all times. If a coating of stainless steel cleaner/polish is maintained, stainless steel surfaces will retain their new, clean & polished appearance indefinitely.
- 6. Periodically remove access panel of cooler and clean out inline "Y" strainer

GYE14 FILTER CARTRIDGE REPLACEMENT

- Loosen and remove bottle filler side access panel, which allows access to the filter. Turn the inlet valve 1/4 turn clockwise to close.
- 2. Raise the filter assembly straight up about six inches and while holding the cap firmly, turn the replaceable cartridge filter counterclockwise to remove.
- 3. Remove and replace the cartridge turning clockwise to secure.
- Turn inlet valve 1/4 turn counterclockwise to open and test for leaks and proper operation before re-attaching bottle fillers side access panel.
